METAL TREATMENT

PARTS CLEANING

STRIPPING

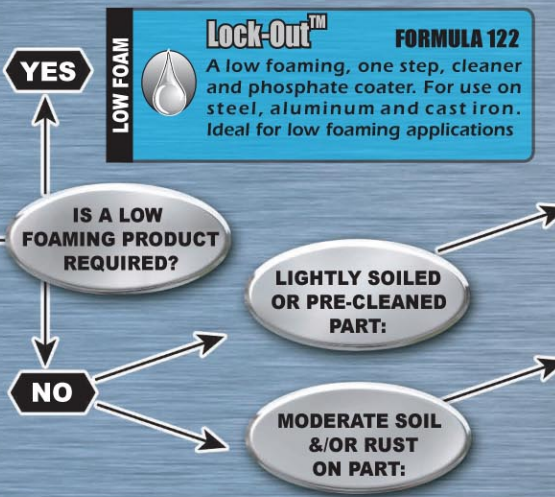

CONCENTRATE → **D-Scale™ FORMULA 5620**
 A liquid acid concentrate that is designed to effectively and easily remove lime, iron, and scale from surfaces with little effort. USDA approved, low-odor and biodegradable.

SUPER CONCENTRATE → **Buster™ FORMULA 5621**
 A Super concentrated blend of acids specifically formulated to remove lime, rust, iron, & scale.

LATEX/ACRYLIC → **Natural Solve™ FORMULA 241**
 Uses special biodegradable citrus solvents for removing latex and acrylic paint from most metals with a wonderful citrus fragrance.

ENAMEL → **Cast Iron Cleaner™ FORMULA 251**
 Extra heavy-duty powder alkaline cleaner designed to remove heavy grease, heat treated oil, limited paint, rust and carbons. Not safe on soft metals such as aluminum.

PHOSPHATIZING

IRON PHOSPHATE → **Metal Prep™ FORMULA 119**
 A one-step product that produces a phosphate coating on clean steel, aluminum and cast iron. Easy to use and effective.

IRON PHOSPHATE → **Iron Kote™ FORMULA 120**
 One step acid cleaner, stripper and phosphate coater. For use on steel, aluminum and cast iron. Rinse with a diluted solution to enhance paint adhesion.

ZINC PHOSPHATE → **Zinc Kote™ FORMULA 121**
 Provides maximum protection against corrosion. Produces a zinc phosphate coating on clean steel, aluminum and cast iron.

SEALING
